My Goals: Find techniques to improve the performance of the surveying works, the geodesy and photogrammetry. I want to use my knowledge and experiences to obtain a continuous improvement of the quality in the works of engineering.

Experience: 2000-2005: Temporary jobs in highways and general topography.

Company: Ing. Garcia Altamirano (GISISA) Profits:

My work was: Topographical surveying of highways, consultant's office in the use of software (Autocad, Excel).

Company: Ing. Fco. Garcia Pineda (Proyectos Topográficos SA) Profits: Increase the speed of processing data surveying, with the accomplishment of programs in visual BASIC and Excel, investigation of the operation of software focused to terrestrial routes (Autodesk land, Civilian CAD, Civilian design) and with this obtained a better yield of the company. Accomplishment of the geometric project of a section of 10 km of the federal highway San Miguel de allende- Guanajuato, in the state of Guanajuato. Topographical surveys of highways and outline of new ways.

December 2004 - February 2005

Company: Grupo FRISCO SA of CV Profits: Professional practices in the tayahua miner located in Terminal de providencia, Mazapil, Zacatezas. I did Subsurface topography.

Julio 2005 - November 2005

Company: Constructora el cajón SA (ICA) Profits: Professional practices in the construction of the hydroelectric project "El cajón" in neighborhoods of Tepic, Nayarit. I did General topography, concrete volume calculation, cut and embankment.

November 2005 to June 2007

Company: Oceanografía SA of CV

Marine surveyor: Positioning of the platform PSS Jupiter, PSS Jasminia. Ships Positioning : "Caballo de mar" and "Agnes Candies" in the contract "estabilizado y conservación de líneas submarinas". Location of Offshore structures and coordinate calculation (UTM). Anchor positioning in the northeast marine region PEMEX in Campeche, Mexico. Anchor positioning of the ship "Caballo de troya", positioning of the ship "Caballo andaluz" in the contract "conservación e inspección de líneas submarinas". Bathymetries in Coatzacoalcos port, Control of laying pipeline, anchor positioning of the ship DLB-801, Inspection of pipelines with ROV and mapping of the marine bed with sounding of lateral sweeping, receivers GPS supervision: cnav and trimble.

June 2007 to today

Company: Surveypro

Today, I work in the processing data surveying

Languages: English, Spanish

Education:

2005 May: Ingeniero Topógrafo y geodesta (Engineer Topographer and geodesist or Surveyor), university of México (UNAM). Thesis: "Analysis of the precision of different systems DGPS". Professional license in Mexico: 5317823.

2000: Computation Technician, UNAM

Software: AutoCAD 2D, 3D, CivilCAD, AutodeskLand, Civil Autodesk Design, Autodesk civil 3D 2008, Matlab, Office, Microsoft visual BASIC, BASIC, C, Pascal, Qinsy (navegation system), Excel.

Courses:

2008: Analysis of geological structures. Institution: UNAM.

2006: The basic safety training course for Rigs and Mobile Offshore Units. Institution: "Instituto de capacitacion para la Industria Maritima y Portuaria, S.C."
